

Welcome to Chocokata !

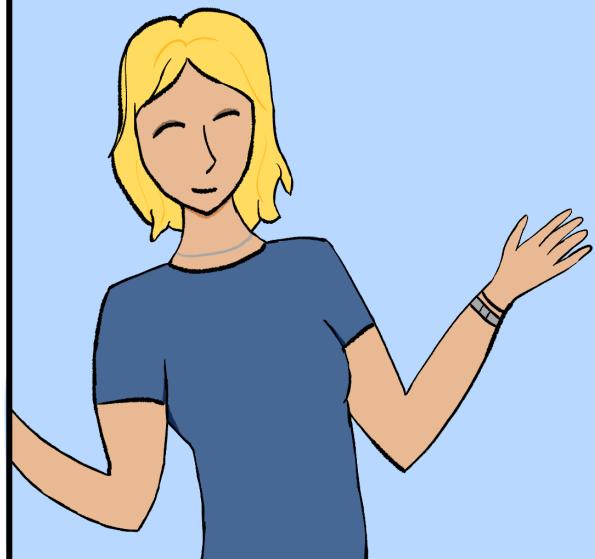

(aka la chococratie)
(ou la chocolarchie)

a short story by Faust

Merci à vous tous·tes <3

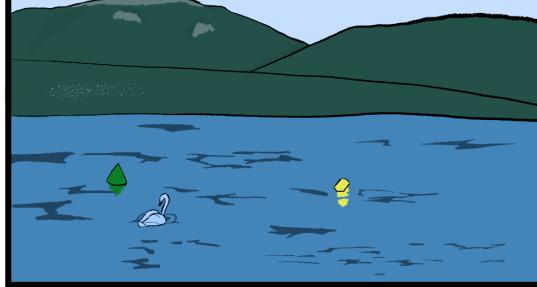

Hi! I'm Faust

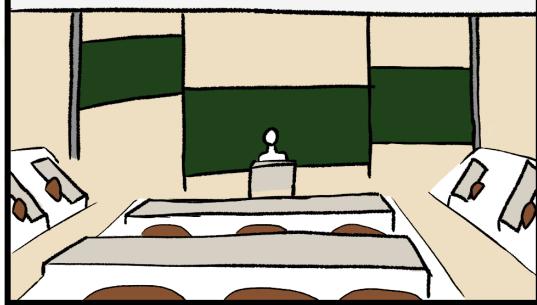

And this year,
I met a great
group with very
nice people!

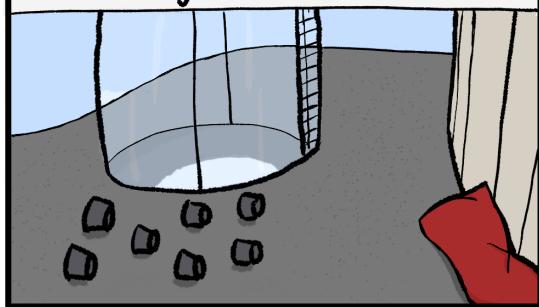

We've been hanging out...

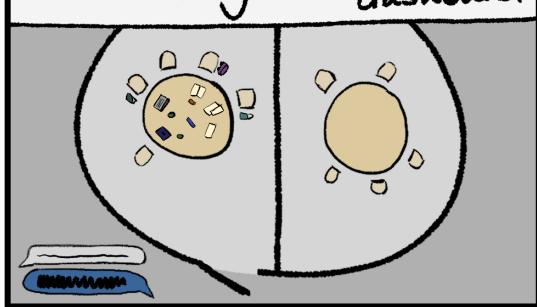

at (most) classes...

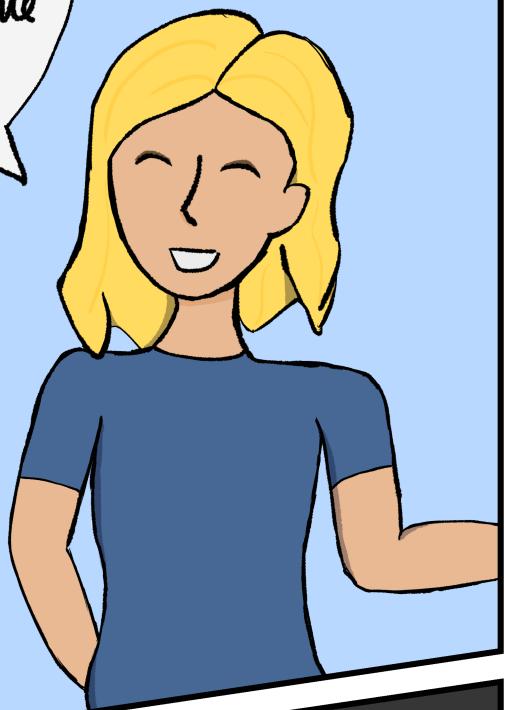

at every break...

and during academic
crashouts.

And throughout the year,
we kept track of some
funny quotes we said.

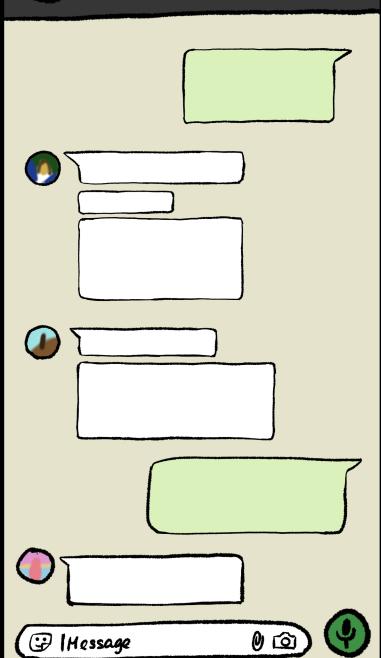

I wanted to make a poster
with all of them but a comic
is fun and allows me to
present the characters

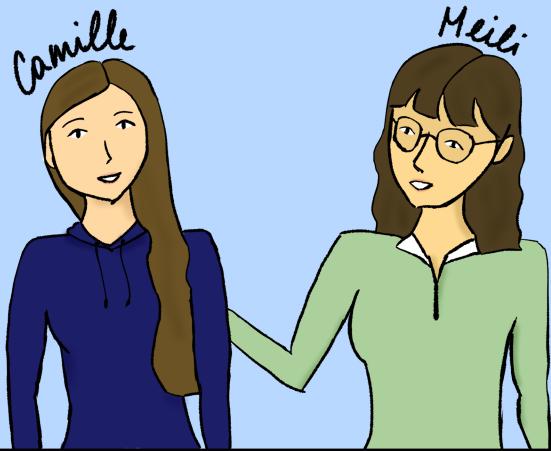

And is also a fun
project because what
do you mean by
"holidays" and "rest"?

Both very kind and caring, as long as Mortal Kompus is not on ! The pillars of this group ❤

Mais regarde-toi
Viktor !

(ça me manque
d'aller tuer
des gens.
Oh oui, moi aussi !)

Il est presque
tout seul, on peut
aller l'agresser

Et il est pas petit d'ailleurs !

Oh putain la veine

En même temps est-ce
que c'est faux ?

The sexual tension between these two is matched by their love of the RLC. Grinding (the Minecraft server).

These two sadly did not leave many quotes, but still gave funny stories.

Finally, me! If you can make me take
a break, I will talk your ear off.

So, I had
a lot of fun
drawing this
comic ...

But it wasn't as fun as the year
I spent with you all. Even if
first-year engineering isn't.

So thank you
for all the laughs
good times, the
stupid crashouts and
funny stories. I hope
we'll get more
next year!

Now, let it be known that
we were not the only ones to
say funny things during
lectures. So I'll leave you
with some unexpected quotes
from our teachers!

"If you had nightmares about gcd computations in high school,
your nightmares were correct"
- Gastpar

"This is the way to
connect" - Stojilović

"Le cours manque parfois de carte
C'est aussi le cas avec la vie"
- Lachowska

"So this d, this
amazing d"
- Gastpar

"So data is the new oil or whatever."
- Gastpar

"Si on réfléchit, peut-être ça
n'est pas si compliqué"
- Lachowska

"The D input is no longer just IN"
"Life of D lasting one clock cycle"
"That D went where it had to go and now
waits to be replaced"
"Wild ride"
"When is he gonna change"
- Stojilovic

"We want this D to be gigantic"
"What is this class"
"The secret sauce [...]"
"Poor Galois, probably younger than most
of you, who discovered many things"
- Gastpar

let's add that
to the words
of wisdom
